Ottawa says Unionism will be permanent. * * *

What about the two "Old Parties," and the U.F.A. new-born political kid?

Strikers in Vancouver are anxious about their old jobs. * * *

Pity they weren't so anxious about them before the strike.

One dead, 30 wounded, and 300 prisoners taken in the Winnipeg riot. * * *

One could almost fancy they were reading the casualty list again from the front "over there."

"Our power of resistance is broken and there is no means of averting this treaty," says Germany. * * *

An acknowledgement that Germany was licked to a frazzle.

"The Siberians have quit Ufa" is the latest report. * * *

No, Susie, it does not refer to our U.F.A. political organization.

Bolsheviki, Radicals and Anarchists will be deported by U.S. * * *

When Canada does the same stunt, we may hope for some semblance of law and order in our land.

The Winnipeg sympathetic strike settlement is made without conditions. * * *

And now the sympathetic labor man will be able to figure out how much strike his sympathy has cost him—besides a majority of them losing their jobs.

Vancouver city and employees on strike declare that they will not come back to work unless they are allowed to come back in a body. * * *

There is every probability that there will be no places to come back to, as their old jobs are being rapidly filled by others.

Pat Burns says there is no need to worry unduly over the Alberta crop situation. * * *

But then, Pat Burns is a millionaire. He should worry! Nit!

Certain of the German warships interned at Scapa Flow are reported to have been sunk by their German crews. * * *

Truly Hunnish treachery right up to the last moment.

A Seattle inventor has patented a newspaper stuffing machine that does the work of 14 men in placing sections of paper together. * * *

It will certainly have to go some to beat the "ballot stuffing machine" of notorious fame, used in Ontario a few years back.

Every few days the brewery workers of Vancouver are called out on strike. * * *

The brewery workers will soon be "fed up" on strikes, while the other strikers will be "drunk up."

HEAVY STORM STRIKES CHINOOK

Continued hot weather of the past week, which reached its climax on Saturday is responsible for poorer crop conditions throughout the district. Crops which this spring were making a splendid showing and which showed the best prospects of almost any year in the history of the district, have suffered during the past few weeks by lack of moisture.

A storm which was observed to gather Friday evening in the west did not follow its usual practice of travelling east, and spent itself in the neighborhood of Rockyford and consisted mostly of wind and dust in that locality.

Saturday evening a heavy downpour accompanied a storm which passed over Chinook district, travelling from south-west to north-east, and covering an area of 12 or 15 miles wide. It also accompanied this storm, but no reports of very serious damage done have been received. Crops which received this moisture are considerably freshened as a result.

CHINOOK AGRICULTURAL SOCIETY.

Minutes of meeting held June 14th.

Members present: Messrs. F. E. Foster, W. A. Todd, I. W. Deman, W. Whiteside, Neil McLean, F. Otto, W. McLaughlin, J. Key, E. Q. Hocart; Messdames George Isbister, Gregg, Stewart and Foster.

Minutes of previous meeting were adopted.

Mr. Elliott was given the use of the land west of the road until the society needed same.

Messrs. Whiteside and Deman were elected judges of the races, and Mr. Noble starter.

Mr. Briggins Shaw was asked to reconsider his special prize.

It was decided to send a membership ticket and vote of thanks to F. Harris and R. McLean for work on agricultural grounds. The following special prizes will be given by the society for gopher tails: \$12, \$8, \$5 and five prizes of \$1 each. Tails must be tied in bundles.

On motion the thanks of the society were given to Messrs. N. McLean, R. McLean, and J. Key for work on fair grounds.

It was decided to reserve \$200 for current expenses.

A motion was made that if sports committee pay rental fee of \$25 were given to Messrs. N. McLean, R. McLean, and J. Key for work on fair grounds.

In amendment, it was decided to drop the subject of building a booth.

It was left with Mr. I. W. Deman to find out to whom the granaries on the fair grounds belong to.

Adjourned.

KINMUNDY

M. Campbell is plowing 25 acres for Maurice Butten.

F. Trotter has a contract of breaking from O. Morrison.

Chas. Seriz has purchased a team of horses from S. Season.

Mrs. John Carter has returned from Calgary much improved in health.

Lynn Swartz has moved north about 100 miles until harvest. He is interested in a stock ranch there.

George Anderson has sold his farm and is about to return to the States.

Lieut. Bowford Watkins has returned from England after four years of service, and is improving his farm this spring.

Mr. P. W. Peterson and bride returned from Southern Alberta last week to their farm two miles east of Kinmundy post office.

The crops around here are looking very poor. Unless moisture comes this week there will be very little—if any—grain to cut this harvest.

MILL RATE FIXED FOR SOUNDING CREEK

Appropriations for Divisions—Council May Open Up Blind Road

At Saturday's meeting of the council of Sounding Creek the rate of taxation for the municipality was struck at seven mills, while appropriations for the different divisions in the municipal district were fixed as follows:

Division No. 1—\$2,000.
Division No. 2—\$2,000.
Division No. 3—\$1,500.
Division No. 4—\$1,700.
Division No. 5—\$1,400.
Division No. 6—\$1,200.

There were present at the meeting: Councillors Fraser, Proctor, Clapperton and Farrow.

The minutes of the previous meeting were read and adopted.

On motion of Mr. Fraser the question of providing livery for a district nurse was tabled until the next meeting.

Mr. Clapperton moved and it was agreed to ask for a survey for a road on blind line running between section 4 and section 9 in township 29, range 8, and that the council open up a road along this line on condition that the adjacent owners agree to donate the land.

The taxes against the land of R. Garland and W. J. Cummings were written off from the year of their enlistment to the end of the year 1919, on motion of Mr. Clapperton.

On motion of Mr. Farrow, Robert Vallance and Dan Anderson were instructed to purchase poles and build new pounds according to the specifications decided on last year.

Weed inspectors were appointed as follows: Chief weed inspector, John McLean; Division 5, John McLean; Division 3, Walter Butler; \$49; A. J. Watson, \$75; E. O. Fraser, \$71.50; Hugh McLean, \$18.50; Herbert Mayes, \$31.75; Henry Rosenau, \$10; R. Watson, \$83.25; Wm. Fraser, \$67.50; Wm. Gillis, \$31.50; W. Faris, \$22.50; Wm. Kay, \$9.00.

Gopher hunters—W. H. Clapperton, \$1.45; E. A. Proctor, \$1.75; R. C. Fraser, \$18.10; L. M. Colpitts, \$28.50.

L. M. Colpitts (freight), \$10.10; Western Corrugated Culvert Co., \$132; Anton Petersen, \$62.00; Plaindealer, \$5.37; Western Corrugated Culvert Co., \$256.50; National Elevator Co., \$147.25; Ballantyne Bros., \$4.00; L. M. Colpitts, (salary) \$100; (commission) \$46.35; (stamps) \$35.

The council adjourned until Saturday, July 28.

CHINOOK WINS

In a league game of baseball on Friday evening Chinook won from Youngstown by a score of 15 to 14. It was Chinook's game.

Results of the games at Cereal Wednesday are as follows: Cereal 11; Youngstown, 9. Chinook 12; Cereal, 12.

A lot of prairie is being broken this year and some are waiting for rain.

Miss N. J. Daley, Rollinson, has disposed of her half section.

Preparations for the summer's fair at the exhibition grounds has been begun with the fencing of the grounds.

TAXATION OF LAND ACCORDING TO VALUE

Provincial Taxes Will Be Levied by New Method With New Year

When a rate of taxation amounting to about \$2.00 per quarter section was the total tax required to be levied on the lands in the province for provincial or municipal purposes, the fact that these taxes were levied on a flat rate of so much per acre, regardless of the value of the land, did not cause any particular complaint, as while it was not a fair basis of taxation, the amount of taxes payable on each quarter section was so small that no particular hardship was caused, and the fact that a man owning a quarter section worth about \$1,000 paid as large a tax as a man owning a quarter section worth \$4,000 was not given much consideration. As the years went on it was necessary to raise the rate of taxation and to levy additional taxes. With increased taxation, it became very evident that the levying of taxes on an acreage basis was not fair. It is admitted that it is impossible to levy taxes on an absolutely fair basis, but the increasing of the amount of taxes payable on a quarter section made it clear that a system of taxation whereby a quarter section worth only about \$1,000 was taxed as high as one worth \$4,000 was not just. Under such a system of taxation, taxes are not levied in accordance with the ability to pay, pays only the same amount of taxes as his poorer neighbor who has land worth only one-fourth as much. This is for the purpose of taxation the value of the property owned by the man with the poorer land is rated much higher than its real worth, while in the case of the man with the more valuable land, his property is rated at much less than it is worth.

In considering the merits of any system of taxation, the matter must be approached from the standpoint that taxes should be paid according to the ability to pay, and looking at it in this way, there does not appear to be any sound reason against the system of levying taxes according to value, rather than on an acreage basis. This principle having been recognized in connection with taxes levied directly or indirectly for the benefit of the province at large, the different act of taxation on lands owned by the province from taxes on lands were amended at the last session of the legislature by legislation introduced by the minister of Municipal Affairs, so that beginning with the year 1920, all taxes levied by the province, either directly or indirectly, will be levied according to the value of the land, and not according to the area. That is all taxes levied on lands outside of organized school districts under the Education Tax Act; taxes levied on all lands in the province under the Supplementary Revenue Act; taxes levied on lands outside of organized municipal districts under the Improvement District Act, and taxes levied on lands subject to taxation under the Wild Lands Tax Act, will be levied according to the value of the land taxes. The only exception will be the taxation of lands leased from the Dominion government, and in these cases the taxes will still be levied on an acreage basis, but as the rate is low it does not create any great hardship. In preparation for this work, all lands outside of organized municipalities are now being valued under the direction of the Minister of Municipal Affairs and municipal districts which are not already levying their taxes according to land values, will be required to value all their lands for the purpose of taxation under the Supplementary Revenue Act next year.

The basis of taxation is the cash value of the land without taking into account any improvements made upon

Aviatrix Makes Record

French Flier Ascends to Altitude of 15,700 Feet

Paris.—Announcement is made that Baroness de la Roche, a lately-known French aviatrix, during the last week of the month in which the late Jules Vedrine landed on the roof of a department store here last January, has reached an altitude of 15,700 feet. Reports of her flight have been recognized by the French Aero club, and she is given the record for the height attained by a woman flier. The level she reached is over 1,600 feet higher than the best record made by Ruth Law.

Combating the Cutworm

E. H. Strickland, government entomologist at the experimental farm, Lethbridge, is investigating the appearance of cutworms reported at Redway, in addition to the local cutworms have been reported at work in Blackie and High River. Superintendent Fairfield of the experimental farm, urges farmers who notice the pest at work in their fields to report at once by telephone to Mr. Strickland at the experimental farm, so that he may be in a position to help combat them.

KEEP CHILDREN HEALTHY

To keep children healthy the bowels must be kept regular and the stomach sweet. Nine-tenths of the ailments which afflict little ones are caused by derangements of the bowels and stomach. No other medicine can equal Baby's Own Tablets in guarding either the baby or growing child from the ills that follow a disordered condition of the bowels or stomach. They are a mild but thorough laxative and never fail to give results. Concerning them Mrs. W. B. Coolidge, Sarina, Ont., says: "I have used Baby's Own Tablets for over three years and have found them the best medicine I have ever used for my children. I never have any trouble giving them to my little ones, and they have saved me many a doctor's bill. My advice to all mothers of little ones is to keep a box of the Tablets in the house." The Tablets are sold by all medicine dealers or by mail at 25 cents a box from Dr. R. Williams' Medicine Co., Brockville, Ont.

Yes, Hazel, a man is the most important piece of furniture in a woman's air castle.

I was cured of a severely sprained leg by MINARD'S LINIMENT. JOSHUA A. JYVACHT. Bridgewater.

Dwindling Heligoland
Heligoland is like the stump of an old molar, which has been "stopped"—with ferro concrete. Eleven hundred years ago its circumference was 120 miles, and five centuries later measured but 45. It is now a question of acres, little more than 200, or the size of an ordinary Canadian farm.

Left to nature, it would soon disappear altogether, a fate anticipated by the experts who propose to remove German "stopping" and allow nature to take its course. Teutonic dentistry let loose on the world!

What Empire Meant

At the Call of War to Fight for and to Save the Motherland

It is our national characteristic to make little of great things. No British soldier may be found to confess that he "did his bit" (pedestrian and humorous phrase) for any great or noble motive. He will always assign to some cheap and unworthy motive what should be ascribed to the pure flame of an exalted patriotism. We do not "gush." But in our habitual reticence and deliberate self-deception we often injure our own great cause. An instinct to frown upon a "success" of military discipline as something hysterical and even tedious may be sound enough. But we cannot and should not forget that at the call of war men rushed from the Dominions to fight for and to save the Motherland. This was the climax of all that empire meant, a confusion which our enemies never expected, a triumph of race and character which we scarcely yet appreciate at its true worth. —London Daily Express.

Southwestern France has deposits of iron ore that were exploited as far back as the time of the Roman occupation, and which still yield some of the purest minerals found in that country.

When you begin to criticize a man you must not forget that he is growing. By tomorrow he may have quite outgrown the quality which you dislike.

More Automobile Users

More automobiles have already been granted licenses in Alberta to date than through the whole of last year. In Saskatchewan last year's record of being rapidly reached and is likely to be passed before the end of this month. In Alberta 29,250 licenses were issued in 1918, while by the middle of May this year more than 30,000 had been granted. Saskatchewan's figure in 1918 was 46,880, which will soon be overtaken as 44,000 had already been issued up to fifteenth of May. No fewer than 18,150 new licenses were issued in this province during April.

Ex-Kaiser and Son Go Home

London.—The former German emperor and the former crown prince will return to Germany as soon as the peace treaty is signed, according to a well-informed German source in Amsterdam quoted in a wireless dispatch.

Choked for Air.—Some little irritant becomes lodged in the bronchial tubes, others gather, and a awful clogging of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. Usually it completely cures. It has behind it years of success. It is the sure remedy for every sufferer.

Looped the Loop 45 Times

The War Department at Washington has been notified that Lieut. Ralph J. Johnson, pilot, with Lieut. Mark R. Woodward as passenger, had established a new world's record for looping the loop in mid-air.

In the presence of an official board of officers appointed to witness their flight and looping, these officers, on May 16th, at Carlisle Field, Florida, looped the loop 45 consecutive times. The looping time was 114 minutes 10 seconds, and their flying was 120 minutes. They consumed 23 quarts of oil, 39 gallons of gasoline, 11 gallons of water, and the speed of their motor was 1,500 revolutions a minute.

Piles Cured in 6 to 14 Days

Druggists refund money if PAZO OINTMENT fails to cure itching, burning, or protruding piles. Sufferers Irritation, Swelling and Itch. Write for free leaflet after the first application. Price 60c.

Too often when a man's good deed speak for themselves he spoils the effect by going around with his mouth open.

Other Tablets Not

Aspirin At All

Only Tablets Marked With "Bayer Cross" Are Aspirin
If You Don't See the "Bayer Cross" on the Tablets, You are Not Getting Aspirin—Only Acid Imitation!

Genuine "Bayer Tablets of Aspirin" are now made in Canada by a Canadian Company. No German interest whatever, all rights being purchased from the United States Government. During the war acid imitations were sold as Aspirin in pill boxes and under other containers. "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin. Buy only tablets marked with the Bayer cross. For example, acute rheumatism, neuralgia, colds, rheumatism, lumbago, neuritis, and for pain generally. Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Aspirin is the trade mark, registered in Canada, of Bayer's manufacture of Monoaceticacidester of Salicylicacid.

The young girl with her hair done up for the first time possesses more awe-inspiring dignity than a floor-walker in a dry goods store.

From Side Line to a Main Industry
The poultry industry hitherto considered a side line in Western Canada is gradually creeping to a position of first importance, and one on which farmers can rely to bring them steady returns. Last year Saskatchewan farmers received over \$3,000,000 from this side line. In the past most of the farmers have contented themselves with raising poultry for their own needs only and have not paid much attention to their stock. But there are now signs of a greater interest in this phase of farming, and with them will come greater production, for no country is better suited for poultry raising.

Where Wives Are Cheap

What is the market in wives? It is said that among the Alms the price of one is a bear ham. The Kaffir varies from four to eight cents, according to the competition for the particular bird.

A score of cartridges buys a wife in Uganda, and the Australian black gives the weight of his better half in butter, while the Tartars in Turkistan get as many wives as they want at the price of a box of matches each.

You May Be Skeptical

About What Dr. Chase's Nerve Food Will Do for You, But Here is the Evidence.

When the blood gets thin and watery, when the nerves become weak and exhausted, when your vitality is run down and you feel weak and tired, it is because nourishment is lacking. You may be eating as usual but your digestive system fails to obtain from the food you eat the elements from which new blood and nerve force is created. Because Dr. Chase's Nerve Food supplies this element of blood and nerves it is the most successful of restoratives.

While personal experience with a medical treatment is the only absolute proof that it will benefit you, still we are all similarly constituted and what will help one will help another under similar conditions. This is why it is so interesting to read the experience of other people and many will find in this letter their own conditions described.

Mr. Thomas Williamson, Pictou, Ont., writes: "For the last twenty years I have had trouble with nervousness. At different times when I would have severe attacks, I was under the doctor's care, but this only gave me temporary relief. Twice I was to a sanitarium in Toronto, where I secured some relief at the time. This past summer I broke down and under nervousness, and it was then that I commenced using Dr. Chase's Nerve Food. It did not do too previously, because I used to get so badly confused. My appetite is good, and I can sleep well, too. Generally speaking, I am so much better that I am proud of my improvement. I cannot speak too highly of the splendid results I have secured from the use of Dr. Chase's Nerve Food."

Dr. Chase's Nerve Food, 50 cents a box, is sold by all dealers, or Edmanston, Bates & Co., Limited, Toronto.

Good Financial Standing

"Why, Maggie, Sandy's growing a fine set of legs in his clogs." "Nae doo, they're looking grey big. Ye see, sir, it's whar he keeps his War Bonds!" —The Passing Show, London.

"Black Watch"—The Best Black Plug Chewing Tobacco on the Market

Use Soot Water
Soot water, made very weak, may be sprayed on the foliage of crops and on sweet peas and most hardy plants, flowers or vegetables. It will check greenfly caterpillars, leaf miner and other troublesome pests. Soot water is also a good fertilizer and may be adulterated with liquid sheep or stable manure to advantage. The latter, however, must not be applied to the foliage, but only on the soil about the plants.

Preventing The Growth Of Cast Iron

This Characteristic Believed to Be Due to Internal Oxidation

Amongst the fascinating problems which make engineering science at once a most exacting and a most fruitful study the characteristic behaviour of metals under varying conditions provides many curious cases. For example, grey cast iron grows appreciably in volume when exposed to high temperature. This characteristic, which causes much trouble in cast dies, valve seatings and other parts, is believed to be due to internal oxidation caused by the penetration of hot gases into the metal. A remedy recently suggested in England is to eliminate free graphite from the surface of the metal, this being the cause of its porosity. Successful results have been obtained by annealing the parts for several days in iron rust at a temperature of from 1,650 to 1,830 degrees Fahrenheit.

TODAY! BUY CATARRHOZONE

Gives Effective Relief in Five Minutes, and Cures Perfectly

FINE FOR COUGHS OR COLDS

It was their inability to reach the real source of catarrh and bronchitis that caused the medical profession to drop liquid cough medicines and adopt "Catarrhazone" instead. This wonderful inhaler provides a cloud of medicinal vapors which are so healing and comforting as to entirely banish cough, catarrh and throat trouble in a very short time. The most wonderful thing about Catarrhazone is that no matter where the germs of bronchitis or catarrh are hidden, Catarrhazone will reach and destroy them. Get the large size, lasts months, is sure to cure you, price \$1.00; smaller size, 50c; sample or trial size, 25c. All dealers.

Profit In Feeding Lambs

Feeding of Young Lambs Is a Paying Proposition

The Dominion Experimental Farm at Morden, Manitoba, recently sold six lambs, weighing 380 pounds, at 24 cents a pound, or an average price of \$15.20 per lamb. The oldest lamb, which was born January 20, weighed over 80 pounds at the time of sale.

This sale emphasizes what many farmers in Western Canada have long ago learned, namely, that the feeding of young lambs is a paying proposition, yielding profits as large as in any other phase of farming in the country.

The above weights were obtained without any special pampering. The mothers were very ordinary ewes, descended a few years ago from a poor type of animal as could be found anywhere on the range. During the fall and winter they were given concentrated pea and bean straw, together with culled peas and beans. They preferred this to any other feed and thrived upon it. After the lambs were born the ewes were given a little straw and ensilage, in addition to the feed previously given. The lambs soon learned to eat these feeds, and in three months reached the weights mentioned.

This experiment is quoted because it shows what is possible along these lines. Many farmers have obtained as good or better results, and there is a good market for all the lambs that can be produced in this manner.

Florida Sunshine

The June brides are mobilizing. Wallflowers are seldom pressed. Attractive is the flirt with an arched eyebrow and an arched instep. It's strange how some men can be so tight with their loose change.

In spite of the fact that it is her funeral, Genoa wants to sit on the front seat of the hearse and take the reins out of the hands of the driver.—New York Tribune.

School Exhibitions

Many Exhibitions to Be Held in Saskatchewan

It is expected that between 225 and 250 school exhibitions will be held in various parts of Saskatchewan during the summer and fall. The school fair movement has become very popular throughout Western Canada, not only with the boys and girls of the province, but also with the adult population. Largely as a result of the growth of this movement has been the organization of rural agricultural associations. These associations have been first organized in 1916, and there are now no less than one hundred of them throughout Western Canada, and the prospect is that many more will be organized this year. Their constitution is very elastic and permits a wide range of work. They were organized primarily to assist the school exhibitions, but their activities have outgrown this field of service, and they are developing into general community centres, where the welfare of the general improvement of the community are discussed.

A Pill That Lightens Life.—To the man who is a victim of indigestion and constipation, the business becomes an added misery. He cannot concentrate his mind upon his tasks and loss and vexation attend him. To such a case, the remarkable Vegetable Pills offer relief. A course of treatment, according to directions, will convince him of their great excellence. They are confidently recommended because they will do all that is claimed for them.

Don't think that because a judge is small he isn't a fine imposing man.

Minard's Liniment used by Physicians

No Treating With Bolshevists

Russian Bolshevism Has Nothing in Common With Civilization

Russian Bolshevism, aptly described as a "product of the Imperial German Bank and the criminal soul of William," has nothing in common with civilization. Any manifestation of inclination to recognize the unhinged wretches who have devastated Russia simply encourages Lenin and Trotsky to perpetrate additional atrocities. The revolt against Bolshevism is growing; the defeats of Bolshevik armies by the forces of law and order point to the establishment of a government based on sanity. It is impossible to believe that the vast Russian country will always be dominated by the Reds. Meanwhile the least that the allied nations can do is to refuse to meet any Bolshevik at the council table and to encourage the forces which are combating Bolshevism.—Providence Journal.

What It Means

It has come to the point where a body has to earn twice as much as he is worth in order to get half enough to live on.—Jefferson City Tribune.

Mrs. Lilian Taylor Tells How Cuticura Healed Her Baby

"Our baby was two weeks old when his face became very red and terribly itchy, and he was fairly crazy rubbing and scratching till the skin broke and bled. He could not sleep and died buty. His face looked as though he might be disfigured for life."

"I thought I would give Cuticura Soap and Ointment a trial. I found the face sample so good that I bought more and two cakes of Cuticura Soap and a fifty cent box of Cuticura Ointment healed him." (Signed) Mrs. Lilian M. Taylor, Box 99, Brackbridge, Muskoka, Ont., Dec. 30, '18.

Cuticura Soap to cleanse and purify, Cuticura Ointment to soothe and soothe and Cuticura Talcum to powder and perfume are ideal for daily toilet purposes.

For free sample of Cuticura Soap, Ointment and Talcum address "Cuticura," Dept. A, Bates, U.S.A. at once.

Cook's Cotton Root Compound

CHILDREN NEED HELP

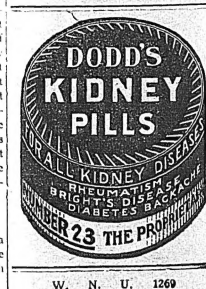

Spanking doesn't cure bed-wetting—the trouble is due to weakness of the internal organs. My successful home treatment will be found helpful. Send no money, but write me today. My treatment is equally successful for adults, troubled with urinary difficulties. MRS. M. SUMMERS, Box 42 Windsor, Ont.

Want British Girls

Guelph Chamber of Commerce Takes Steps to Secure Them
Guelph, Ont.—The Guelph Chamber of Commerce has taken formal steps to induce the immigration of Guelph of several hundred British girls. It has been estimated that 100 girls are needed here at the present time for domestic purposes, and 300 more are required in the factories.

A man should never be ashamed to own he has been in the wrong, which is but saying, in other words, that he is wiser today than he was yesterday.—Lope.

Means, well, do ill, and you'll get yourself disliked.

Italian Cabinet Has Resigned

New York.—The Associated Press issues the following:

Failing to secure a vote of confidence in the chamber of deputies in Rome on a demand by Premier Orlando that the chamber in secret session listen to the government's explanation of its foreign policy, the Italian cabinet resigned.

Such action probably will still further complicate the work of the peace conference, especially in straightening out the tangle that long has existed as regards Italy's claims to Fiume and the Dalmatian coastal regions.

The vote of lack of confidence in the government was an overwhelming one, being 259 to 78. Prior to the vote, the Premier in a statement to the chamber had announced that the various economic and financial questions concerning Italy had been solved, or were about to be solved.

Rome.—The Italian government has resigned, following an adverse vote against it in the chamber of deputies. Premier Orlando, in announcing his resignation and that of the cabinet, said King Victor Emmanuel had reserved decision as to acceptance.

Prior to the vote, Premier Orlando, in addressing the chamber of deputies, said:

"Italy's peace with Germany and Austria has been solved in a manner with which, on the whole, I feel satisfied."

Insisting on the technicality of a secret session, the premier declared that the government needed greater confidence and would treat his motion for a secret session as a question of confidence. The Socialists immediately opposed this.

Signor Orlando, in his address, said Italy's position had been considerably aggravated by international events during the second session of April. He referred to President Wilson's speech regarding the Adriatic.

The Italian delegation at the peace conference, the Premier said, had followed this policy:

"First—maintain, with firmness all the essential points of the Italian claims, without which Italy is convinced peace will be neither just nor adequate to the immense sacrifices suffered."

"Second—Remain faithful in your duties toward the Allies."

"Third—Avoid any blind form of obstinate intransigence. Indeed, facilitate conciliatory suggestions capable of producing accord in the conference over the problems concerning Italian frontiers."

Premier Borden Stays at Home
Ottawa.—The situation with regard to the Canadian plenipotentiaries to the peace conference as it is known in Ottawa is that the Premier, Sir Robert Borden, is not returning to the conference at Paris. Sir George Foster is returning to Canada on account of the serious illness of Lady Foster.

Hon. A. L. Sifton is leaving Halifax to attend further sittings of the peace conference. This means that Hon. A. L. Sifton and Hon. C. J. Doherty will be the signatories of the peace treaty on behalf of Canada, and that the draft will have to be further amended.

Lord Northcliffe III

London.—Viscount Northcliffe, newspaper owner, underwent an operation. His condition is satisfactory.

End Of Prohibition When Peace Signed

Ottawa.—That orders-in-council prohibiting the importation, manufacture and transportation of intoxicating liquor shall terminate with the signing of peace, was declared by the senate. A bill from the commons, enacting, as statute law the orders-in-council of the government, proclaimed under the War Measures act, was taken up by the senate in committee of the whole.

Senator Devey offered an amendment striking out the words "and for twelve months thereafter" from the declaration that the regulations "shall continue in force during the continuance of the present war and for twelve months thereafter."

The amendment carried by 34 to 24, after a number of speeches, chiefly dealing with the constitutional point on second reading, that by section 121 of the B.N.A. act inter-provincial trade could not be interfered with.

As a preliminary to taking up the bill, Sir James Loughheed read an opinion from the department of justice given on the constitutional as-

Cannot Dely The Law

Defence of Arrests at Winnipeg Given Out to Various Labor Men

Ottawa.—In reply to a telegram from Secretary Hamilton, of the Toronto Metal Trades Council, with regard to the arrests of the Winnipeg strikers, Premier Borden sent the following message:

"The persons arrested in Winnipeg have been charged with acts which, under the laws of this country, are serious offences. The government intends to maintain the law and to prevent and punish any attempt to subvert the authority of the people as established by their representatives in parliament. Your assertion that the government has been animated by a desire to assist the employing class or to injure the labor movement is absolutely contrary to the fact. No man in this country, whether employer or employee, is above the law, nor can any such person be permitted to defy the authority of the people as a whole."

Messages of like tenor have been sent to H. Knudsen, secretary of the strike committee at New Westminster, and W. Craig, secretary of the trades and labor council, at Brandon, who also sent telegrams of protest to the Premier.

Discuss Fixed Price

Conferences on Grain Problems Are Being Conducted at Ottawa

Ottawa.—No definite conclusions were reached at the conference held between representatives of the transportation, shipping, milling and farming interests, the members of the Winnipeg and Fort William boards of trade and the board of grain supervisors, and Hon. A. C. MacKenzie, acting minister of trade and commerce, in respect to the marketing of the present season's wheat crop. At the conclusion of the deliberations, which occupied several hours, a sub-committee was named to deliberate further. An assurance was given by the representatives of railways and lake carriers that they would be in a good position to fall to move Canada's crop to the seaboard.

There was much discussion of the question of the fixing of the prices and the government control, and it is understood that it was recognized that if Great Britain should require a considerable portion of the Canadian wheat crop this year it would be necessary to continue to provide machinery for the purchase and the handling of the crop.

Uncertainty as to the probable action of the United States made it difficult for the conference to arrive at definite decisions.

Suppressing the Truth

Paris.—The German government, according to reports received here, has forbidden the publication of the memoirs of the late Lieut-General von Moltke, chief of the general staff at the outbreak of the war. It is said that the memoirs contain passages concerning events in 1914 which would produce an unfavorable impression in Germany with regard to the question of war responsibility.

Two New Varieties Of Wheat

Experts Declare Average Yield Can Be Trebled and Good Flour Produced

London.—It was announced that the plant-breeding section of the University of Cambridge, which is closely associated with the board of agriculture, has succeeded in producing two new varieties of wheat named *fenman* and *yeoman*. These were distributed to farmers, and it is reported that the result has been to treble the average yield. One crop produced 96 bushels per acre. Milling and baking trials have shown that while the *yeoman* variety is not equal to the famous red fife, from the viewpoint of milling qualities, yet it is sufficiently strong to produce a good loaf without the addition of imported wheat.

'Black Watch'—The Best Black Plug Chewing Tobacco on the Market

C.P.R. Men to Settle

Winnipeg.—Striking carmen of the Canadian Pacific Railway are considering the advisability of returning to work. They have forwarded a communication to the central strike committee at the labor temple, urging settlement of the sympathetic strike, and indicating their intention to "take such action as they deem advisable" in the event of the strike continuing.

The Canadian National Carmen have also passed a resolution and forwarded it to the central strike committee expressing the opinion that the original cause of the sympathetic strike was settled by compromise on collective bargaining advanced by the metal trades employers.

Peace within the meaning of the law will be, not when a treaty is signed, but when, following ratification, it is officially "proclaimed." When that is done, then the old order of things will be reverted to. "The sale" will not be permitted in union provinces, but the ban on import and manufacture and transport will be removed.

Strike Is Now Nearer Settlement

Arrested Labor Leaders Given Bail and Will Have Fair Trial

Winnipeg.—Alderman E. Robinson, secretary of the strike committee, has issued a statement indicating consideration of a possible early settlement of the strike.

William Ivens, R. B. Russell, Alderman A. A. Heaps and Alderman John Queen, who were arrested with six others on a charge of sedition, libel and taken to Stony Mountain penitentiary, were released on bail of \$2,000 each. It is stated that they have given an undertaking not to take any further part in the present general strike.

As the following statement, issued under the signature of A. J. Andrews, K.C., representative of the department of justice, Ottawa, indicates, the authorities have changed their policy with regard to the trial of the eleven men arrested early Tuesday morning on charges involving seditious conspiracy:

"As representing the department of justice, in order that the citizen should have a cause to complain that the government was disposed to deny the following persons, namely, R. B. Russell, W. Ivens, John Queen, A. A. Heaps, George Armstrong, and E. E. Bray, a fair trial by jury if they so desire, I have decided to postpone any proceedings for their deportation until the charges against them have been heard. Having so decided, and as each of these persons has undertaken to refrain from taking any part, directly or indirectly, in the strike now in progress, and in view of the fact that there is a strong possibility, in view of the statement as to collective bargaining issued by the metal trades employers, of the sympathetic strike being immediately called off, I see no reason why the accused, until they are tried, should be detained in custody, and accordingly I am consenting to their being admitted to bail on sureties of \$2,000 each."

It is understood by these persons quite definitely that if they fail in their undertakings they will be immediately rearrested and placed in custody.

The six men who are being let out on bail will be tried in the civil courts at Winnipeg. The date for the trial will probably be June 25, but this depends upon whether counsel for the crown and the accused are quite prepared to proceed with the case at that time.

In the case of the five men of alien birth who are being detained at Stony Mountain, they will likely come before an immigration board of inquiry, of which Thomas Gellay, acting commissioner of immigration in Winnipeg for the federal government, has been appointed chairman. This board will not institute proceedings just yet, it was officially stated, as it is the desire of the authorities to get such evidence submitted showing why the accused should be deported so that the minister of immigration, Hon. J. A. Calder, will have no occasion for upsetting the decision of the board.

For New Farmers' Colleges
Edmonton.—Tenders are opened for three agricultural schools at Raymond, Youngstown and Gleichen. The successful tenders aggregate \$180,419 and are awarded to Smith Brothers & Wilson, Lethbridge, at \$144,000; Ross Brothers, Edmonton, for plumbing, etc., \$43,000; and H. H. Dewey, Edmonton, electrical work, \$3,419.

Coast To Coast Flight

British Donate Big Airplane Fleet to the Dominion

Vancouver.—That the British government has donated to Canada, free of charge, 107 airplanes, is the news received by R. J. McLaren, Vancouver, from his son, Maj. Donald Rodger McLaren, D.S.O. and bar, M.C. with two bars French Legion of Honor and Croix de Guerre with palms. He is liaison officer with the Royal Air Force.

The Canadian Air Force is to attempt a flight from coast to coast, and the free gift of these machines will, it is believed, lead the Dominion government to take steps to incorporate the Canadian air force as one of the permanent branches of defence.

Curtailling Liquor Supply

Physicians Have to Set Limit to Prescriptions in Alberta

Edmonton.—A limit of 100 liquor prescriptions a week from any one physician has been set by the attorney-general, pending a decision as to that effect from the council. Under the new scheme of serially numbering prescriptions the doctors are required to return their prescription book stubs to the department, and since the new scheme has been in operation for only about two weeks, comparatively few returns have yet been made. In some of these cases, however, the blanks have been used up to such an extent and with such rapidity that the department has found it desirable to set a limit upon the number of prescriptions that will be accepted as legitimate.

Bomb Terrors to Continue

Washington.—The menace of bomb outrages still hangs over the country, is the belief of officials of the department of justice. Mr. W. J. Flynn, chief of the department's bureau of information, said there were more bombs to come, but said it was impossible to say when the attempt to create a reign of terror by explosions might be made.

Will Fight Action Of Senate

Prohibitionists Expect Commons to Aid Their Cause

Toronto.—Leading prohibitionists here express confidence that the house of commons will fight the senate's action in amending the bill prohibiting the importation of alcoholic liquors, so as to make the prohibition when peace is signed, instead of twelve months thereafter as legislated by the commons.

The effect this amendment will have on the coming referendum in Ontario is a matter of speculation.

If the bill as amended is allowed to stand and peace is signed in the meantime, it is argued that many voters who otherwise would vote for prohibition will not do so if the Dominion government permits this province to be flooded with liquor from other provinces or from the United States.

Government Majority On Budget Vote

Ottawa.—The debate on the budget concluded at 2:30 o'clock this morning and the speaker put the question. The vote on the amendment was taken first, and 14 Unionists voted for it. They were as follows:

Crerar, Clark, Maharg, Davis, Levi Thompson, Reid (of MacKenzie), Johnston, Douglas, Buchanan, J. C. Campbell, Fielding, Pardee and MacNutt.

Two Liberals voted with the government, Messrs McCrea, of Sherbrooke, and W. D. Euler, of North Waterloo.

The vote stood as follows:
For the amendment, 70.
Against, 121.

A government majority of 51. A vote was then taken on the main motion.

Messrs. Maharg, Knox and Douglas, who voted for the amendment, then voted in favor of the budget.

W. F. Cocks, the Brantford Conservative protectionist, voted against the budget, as also did the following Unionists: Crerar, Clark, MacNutt, Thompson, Johnston, Reid, Campbell, Davis, Fielding, Pardee and Buchanan.

For the voting stood:
For the budget, 120.
Against, 70.

A government majority of 50.

Taxation on Land

Continued from page 1

the land by the expenditure of capital or labor. In working out this cash value there are only three matters which are required to be taken into consideration, namely:

First—The nature of the soil.
Second—The nature of the surface; that is, whether it is broken by ravines, coulees or timber and so on.
Third—The distance of the land from a shipping point.

As the comparative values will only change under exceptional circumstances, as for example, where a new railway passes through the locality, and as this is the third and last consideration, it will be noted that once a value is fixed, there will not be very much change for some years. This being the case, provision has been made for a valuation of Municipal Districts only once every five years, thus reducing the work and expense in connection with the levying of taxes. The first valuation under this scheme will be the valuation in the year 1920, the next in the year 1925, and so on. Provision has, of course, been made for the valuation in any year of any land which becomes liable to taxation during that year, so that the fact that the general valuation is only made every five years, will not exempt land from taxation which becomes liable to assessment and taxation during any year other than that in which the general assessment is required to be made. Tax notices will, of course, be issued each year.

While a change from an acreage system of taxation to one according to value will cause extra work, matters will soon adjust themselves and there should be no difficulty in administering a system of taxation along these lines. The fairness of taxation according to value will, if the matter is given due consideration, appeal to all fair-minded people as a better system of taxation than the acreage system which makes the owner of poor land, generally a poor man, pay the same amount of taxes as the owner of good land, who is generally a wealthier man and better able to pay.

One of the main objections to taxation of land according to value has arisen from the fact that many land owners are under the belief that if taxes are levied according to value, the owner of the land will have to pay taxes on the value of the land, together with the value of the improvements placed upon it by hard labor and by expenditure of money. Such, however, is not the case. All provisions in the laws of the province in regard to taxation of farm lands, requires the valuation of these lands for taxation purposes to be made on raw land basis and there is no tax on the increased value of lands because of the improving of these lands by the expenditure of labor or money. That is, a man who improves his farm by cultivation, building of fences and putting up of buildings is not punished for doing so by having to pay taxes on such improvements. Raw land values being equal, the owner of improved land has just as large a tax to pay as the man who improves his farm and if he is making no use of his land, has, in addition, to pay a wild lands tax.

Tuesday's west bound train was delayed several hours when the mail car, baggage car and a second-class coach left the track near Murchison. The track sagging on one side was the cause of the wreck.

MONEY TO LOAN

Osler, Hammond and Nanton, general agents for
North of Scotland and other Mortgage Companies
have \$30,000,000 invested in farm loans in the West, the returns from which they re-invest in the same way. They have lots of money now. Their Inspector, Mr. Stickney, who was in the district a few days ago, says "They have barrels of money, and that no good loan will be refused." Let them renew the loan you have on your homestead, and give you more on your pre-emption, give you money to prove it up if you wish. Or let them give you a new loan, as large, and probably larger, than you can get elsewhere. The district needs all the money we can get hold of in this way. Pay up your indebtedness to the bank, to the municipality, to the school, and to others. We can furnish the money. Loans for five years, repayable in three years, without extra charge. Interest at 8 per cent.—nothing but the interest to pay each year.

A National Line Under National Management

Germans Have No Stability

Standards Are Different from Those of Other Nations

If they were not what they are, one would say that the position taken by Scheidemann, Ebert and Von Brockdorff-Rantzau had made it impossible for them, at least, to sign the peace treaty. They have assured their parliament and people that they will not sign. They have denounced the treaty in the most unmeasured terms. They have left themselves no defence in their own political belief; if now they turn around and attach their signatures to the document at Versailles. Judged by general standards, their political future would be killed past all hope of resurrection by such an act. It may be that these standards do not apply in Germany at present. We have too often in these recent years, seen Germans change from arrogance and defiance, to cringing submission, and back again, to assume that on any subject they hold themselves to the same stability of mind that is expected of men of other nations. Our soldiers learned too well that a German could cry "Kamerad" in the most cowardly and abject manner and in an instant become a daring and treacherous savage and thrust a knife into the back of the man who had trusted him. We saw them mourn like humane persons over the devastation which they had wrought to Belgium and France, had brought to Belgium and France at the same time that they were developing new forms of atrocity to increase the horrors. Three times the United States had their promise to cease submarine lawlessness, and every time that they broke their word they could come back with explanations that appeared to be entirely satisfactory both to their spokesmen, and to the German people generally. It is conceivable that this peculiar quality may enable the present leaders suddenly to reverse themselves and not only sign the treaty, but with a general outburst of applause and gratitude from the German people for signing it. —From the Buffalo Express.

To Help Soldier Settlers

Militia Department Arranges Method of Payment in Accordance With Requests

Ottawa.—An arrangement has been made with the department of militia and defence whereby the soldier settlement board may, in specially approved cases, accept war service gratuity on account of initial payment of ten per cent. on the purchase of land by soldier settlers. The settler will be required to execute a power of attorney appointing the district superintendent of the board his attorney for the purpose of receiving and cashing his cheques from month to month and applying the proceeds as stated.

Where the settler has a dependent who is receiving a separate cheque from the department of militia and defence, and whose portion is also assigned, the power of attorney should be jointly signed by settler and his dependent. They will also be required to sign a letter to the department of militia and defence requesting that cheques be forwarded to the district superintendent. When the district paymaster acknowledges receipt, the superintendent of the board is empowered to proceed with the transaction. This action on the part of the board is at the request of a number of intending settlers who may have sufficient cash available for the initial payment, but desire to hold it as a grub stake.

Try the Kaiser

The justification for bringing this man to trial is complete. By a majority the commission declare that the traitor Ferdinand of Bulgaria, Tiritz of U-boats, and Bissing, the tyrant of Belgium, can be haled before an international court. The course of justice must be followed. The man who is the arch criminal was an emperor. If the war criminals go free the moral authority of the League of Nations is shattered before the ink is dry on President Wilson's covenant. Nothing will more certainly save Europe from the horrors of another blood bath than to convince the war plotters and war criminals by a plain example that their fate will be sure and terrible. —London Daily Mail.

Travelling Fingers

Typists' fingers are the most amazing travellers in creation, and are capable of going tremendous distances without the fatigue that would come to the feet and legs in performing a similar journey. In ordinary typewriting the hand may travel according to an expert, 10,000 miles a year and not indicate any impairment in efficiency. This refers, of course, to the average typist in an office.

Salt Deposits In Alberta

Possibilities of Commercial Development of Salt Beds and Bituminous Sands

Edmonton, Alberta.—That the salt deposits down the Athabasca River appear good enough to warrant some active development in the near future is the contention of the Hon. J. L. Cote and Prof. J. A. Allan, of the University of Alberta, who have just returned from a fortnight's trip in the north country. They went north at the request of the Hon. C. Stewart, Premier of the province, to investigate the possibilities of commercial development both of the salt beds and the bituminous sands, and their trip extended 15 miles north of Ft. McKay. A thorough examination of the working conditions along the way was made by Professor Allan, who made notes of the general layout of the country and the location of the several drillings that have already been started, as well as prospects for agricultural development. At Ft. McMurray drillings that had reached a depth of 540 feet below the surface were examined, and at various other points it was found further drilling would be necessary. Tests of the salt at several of these points had been previously made, and the quality found first-class. Further examination of the bituminous sands along the Athabasca River was also made with a view to ascertaining the commercial possibilities. The development of these sands is understood to depend upon the results of laboratory tests now being carried on at McGill University and elsewhere.

What's In A Name?

Many Articles That Have Names That Are Misleading

They call a certain kind of ink India ink, which would lead one to suppose that the ink really comes from there. But it doesn't; more than does India rubber. The ink so called comes from China and, precisely, it should be known as Chinese ink. The rubber comes from Central and South America.

Are camel-hair brushes made from the hair of camels? No, but from the tails of Russian squirrels.

Nor are silkworms really worms. They are caterpillars.

Sealing wax hasn't a bit of wax in its make-up. "Genuine" French briar-root pipes that you hear so much about are not made from the roots of briar, but from the root of a white heath, which is cultivated in the South of France for the purpose.

Do you take the centipede's name literally? Count the feet of one some time, and you won't find more than thirty on the largest specimen.

This Sounds Good

Hard to Say What Bagpipes Might Be Made to Do

"Tis said that Caruso can shatter a wineglass by singing into it, once he gets his keynote.

It is known that the sub-bass of the pipe organ can rack pews to pieces with its sympathetic note. There is a story told of an old fiddler who, having a grievance against the workmen constructing the first suspension bridge at Niagara, threatened to fiddle it down. Of course he was jeered at. But that didn't stop him from haunting near the bridge and experimenting with his base string. When he found the note that suited him, he proceeded to saw it. It wasn't long before the cables were responding and the bridge began to sway precariously. Had the fiddler not been stopped there is no scientific doubt but that he would have fulfilled his purpose.

And so it is with the walls of Jericho, ye skeptics!

Appreciation of the Worm

Consider the poor worm, everybody regards it with the uttermost contempt, and yet— It has an important place in the economy of nature. It is a promoter of vegetation, since it bores, perforates, and loosens the soil, thus rendering it pervious to rains and the fibres of plants. It draws into the earth straws and stalks of leaves and twigs. It brings to the surface as much as ten tons of earth per annum on a single acre, estimates Darwin.

It is all in all, this despised worm, the one little thing that keeps the earth from becoming cold, hard-bound, void of fermentation, and because of that, sterile. Let's give the worm his due.

Col. Joe Boyle, well known to Canadians for the leading part he has played in Rumanian affairs during the past two years, has gone to Bucharest as the Canadian agent in Rumania.

If Germany Had Won

Peace Imposed on Germany Is Easy Compared to Their Own Plans If Victorious

In the summer of 1918, when Germany thought victory within easy grasp, Count Roon, speaking for the Prussian House of Lords, declared that peace would be made on terms including the following:

A minimum indemnity of 45 billion dollars to be paid by the United States, Great Britain and France.

Annexation of Belgium and the entire Flanders coast, including Calais.

Annexation of the rich manufacturing and mineral region east of Toul-Belfort-Verdun.

Great Britain to surrender its fleet to Germany, along with all naval bases and coaling stations to be designated by Germany.

Egypt and the Suez Canal to go to Turkey.

Serbia and Montenegro to be divided between Austria and Bulgaria.

Return of the German colonies.

Similar sentiments had been uttered in the autumn of 1914. By Matthias Erzberger, the peace dove who afterwards flew out from the sinking German ark to tender the olive branch to Marshal Foch.

In order that the policy of leading German intellectuals might be matter of definite record, 1,350 professors, judges, clergymen, students and scientists signed the famous 1915 round robin, of which the following is an extract:

"There must be no misplaced attempts at reconciliation (with France). For the sake of our own existence we must ruthlessly weaken her, both economically and politically, and must improve our military and strategic position in regard to her. We naturally desire such an indemnity as will as far as possible cover the public cost of the war.

Old But Sure

Old and Proved Method for Destroying the Cutworm

An old but sure remedy for the cutworm is made of bran moistened with sweetened water and dusting in Paris green at the rate of one-half pound to 50 pounds of bran. The greater amount may be necessary in severe cases of infestation, and even two pounds of Paris green to the 50 pounds may be used; but this great amount is not believed absolutely necessary, especially at the present prices of materials. More frequent applications would be preferable. It is important that the mixture be nicely moist and not wet, and that it be placed out in the cool of the evening. Usually two gallons of water are more than sufficient to dampen 50 pounds of bran. White arsenic may be used instead of Paris green, but the chief virtue of Paris green lies in the fact that its color allows one to see if it is well mixed with the bran. If this mixture is around a growing crop, it is advisable that the bran be kept away from the plants. Sometimes burning may be resorted to, especially with white arsenic. Molasses or sugar at the rate of one-half pound to the 50 pounds of bran is usually sufficient to sweeten.

The so-called Kansas formula for grasshoppers is also remarkably effective in controlling cutworms. This formula is as follows: Bran, 20 lbs.; Paris green, 1 lb.; molasses, 2 quarts; oranges, 3; water, 3 gallons.

Another View

Does Not Read Like Record of "Ruined Country"

Side by side with the gloomy picture drawn by the German propagandist as to the terrible economic conditions obtaining in the country, and the terrible trade outlook lying before it, comes the news of the holding of the Leipzig "Messe," the great spring fair, crowded to a quite abnormal extent with manufacturers and buyers. Reproductions, says one dispatch, of pictures, picture postcards, paintings on glass, and of statuary were notably abundant. Goods from enemy countries were on sale, and real French fair nets were much advertised. The German Austrian Kunstgewerbemuseum exhibited new silk fabrics, crepes de Chine hand-stenciled in colors, whilst buyers from neutral countries were much in evidence. On the whole, it does not read much like the record of a "ruined country."

Left Foot Largest

Your left foot is larger than your right—in 99 cases out of 100. Science explains it in many ways. But we accept the easiest one, which is that we are a world of left-footed loungers. We lean against posts and door jambs and we do most of our leaning on the left foot; consequently, through the years it has grown to support the weight that the lazy right foot does not. The next time you buy shoes have your left foot measured first.

Winnie's Scored

Once upon a time the present British War Secretary grew a moustache. "Do you know, Mr. Churchill, that I like your moustaches as little as I like your political views," a frivolous little lady said to him, rather perky, at a certain reception. "That is of no consequence madam," was the instant reply, "since you are never likely to come into contact with either."

New Railway Extensions In Saskatchewan

C.N.R. Branch Line Extensions Are Announced by Toronto Office

Toronto.—Contracts for the construction of new lines and extensions of existing lines have been announced by the Canadian National railways. The length of new lines to be constructed will be approximately 340 miles, all in the west and chiefly in Saskatchewan. It is understood that contracts already have been let and the work is to be rushed to completion. The contracts include construction for:

The Amarant extensions, 35 miles on the west-side of Lake Manitoba, Melfort—Northerly line, 30 miles in Saskatchewan.

Humboldt-Melfort line, Saskatchewan, 32 miles—this is to complete the line.

Esiam, southeasterly, 35 miles, in the lake country, Saskatchewan.

Oliver-St. Paul de Melis, 25 miles, Alberta.

Peebles, southerly towards Lampman, Sask., 20 miles.

Hanna, Medicine Hat, Alta., 72 miles.

Acadia Valley line, 25 miles, from a point a little southeast of Alaska, Sask., running westerly into Alberta.

Swift Current extension, southeasterly from Dunblane, 22 miles (Saskatchewan).

Turtleford extension, 2 miles. This is the extension of the line North Battleford to Turtleford.

A Garden of Annuals

Some Are the Finest Gems of the Garden

A bed of hardy garden annuals will give a maximum of flowers at a minimum cost. They are sown where they are to flower and this means a minimum of labor. They begin flowering early and bloom with the very last flowers, and some are the finest gems of the garden.

Included in the list are sweet peas, highly prized in beauty by orchid-breeders. Then there are the poppies, nasturtiums, godetias, cornflowers, scabious, nigella, fragrant mignonette, alyssum, cosmos, zinnias, candytuft, escholtzia or California poppy galliard, staty sunflowers, ipomoea, marigolds, the beautifully veined "salpiglossis, stocks and many others.

When a fine rose on the watering can is used, the soil is sprinkled thickly over the surface. In a week the soil will be covered with a fine layer of soil and the seeds will be sown. Then on a warm day sow the seeds and take the precaution of preventing disturbance by cats, dogs or chickens.

If the weather is dry, a sprinkling with a fine rose on the watering can will be necessary. Do not let the soil dry out.

When the plants are up, thin them out when they are tall enough, so they can develop into stocky plants. The plants removed can be transplanted in another bed. A second thinning will be necessary later, so the plants will stand far enough apart to let them develop to their full size without becoming crowded. Keep the weeds down by frequent cultivation, and when the plants are growing well work in prepared sheep manure over the whole bed. This can be applied four times at intervals during the season with good results.

Descriptions of these plants will be found in the seedsmen's catalogues, and those may be chosen that are most preferred. The cost is so small that a beautiful garden can be had at an expense of a dollar or two for seeds.

Death Sentence For Spy

Austrian Officer in Paris Convicted of Giving Information to Enemy

Paris.—Capitain Funk, of the Austrian army, has been tried and sentenced to death as a spy by a secret court-martial here. It appears that Capitain Funk was in Paris before the war began, and remained in the city throughout the hostilities, and it was alleged at the trial that he made the enemy acquainted with information regarding air raids and long distance shelling of Paris. The specific accusation upon which he was convicted was "Communicating information concerning the bombardments by Gotha and Bertha to the German military attaché at Madrid."

The Methods Of The Hun

What the German Soldiers Couldn't Steal They Destroyed

My home was in Douai. When I visited the town soon after the Germans left it, I found it untouched by shell fire. Strange as it may seem, the houses are standing and the roofs are on the houses. But every place has been ransacked; so much so that in my house the only articles of furniture left are two stools, one of which is of no value. The other, a light gilt footstool in the drawing room, is smashed. Every other article of furniture has been stolen.

The valueless contents of every drawer were thrown on the floor and soiled. Some valuable paintings by Corot were hanging in one of the rooms. They were carefully selected, the canvases were cut out of the frames in the cleanest possible way and removed by the Germans, whereas a hole was kindly kicked through the others.

"This is a precise instance of the methodical thefts. When the people who lived in the house were turned out by the Germans they took away the few papers that were in the safe which was fast to the wall; they left the key on the safe-door and the door ajar, as much as to say there was no need to break it open. On the safe I found a short note, by means of which the door had been smashed. In this destruction for its own sake? No, this is methodical destruction. The safe would eventually have to be replaced, and very likely by one of German make.—Jean Proix, in Everybody's Magazine.

The stamp clerk often weighs out other people's words.

Feeding Stuffs Variable

Relative Feeding Value of Feeds That Are Available

When it becomes necessary for a stock raiser or dairy farmer to purchase feeding stuffs it is important that he has a reasonably accurate knowledge of the relative feeding value of the feeds that are available. Bulletin No. 36, second series, of the Dominion experimental farms, obtainable from the publications branch of the Department of Agriculture at Ottawa, states that while many of the well-known feeds have been kept up to their standard quality, there have been upon the market not a few that are exceedingly poor, some practically worthless, and these sold at prices little, if anything, below those of feeds far superior in nutritive value. Dr. F. T. Shutt, Dominion Chemist, who is the author of this publication, recommends that one buying feeding stuffs should insist on the vendor furnishing a guarantee as to protein, fat and fibre content in such products as the Commercial Feeding Stuffs Act provides are to be sold under guarantee.

According to analysis made at the experimental farm laboratory, the composition of screenings as produced at the elevators, and resulting from the cleaning and grading of wheat and other grains, is extremely variable according to the relative amounts of broken wheat and weed seeds contained. Many weed seeds, if not actually harmful, are at least so pungent and distasteful to stock as to render the meal made from the screenings unpalatable. Screenings that have been purified of what are known as black seeds are shown to be both nutritive and fattening. This is shown not only by laboratory test, but by feeding experiments with cattle, swine and poultry.

When the screenings are put back on the store, the amount of broken wheat and weed seeds contained. Many weed seeds, if not actually harmful, are at least so pungent and distasteful to stock as to render the meal made from the screenings unpalatable. Screenings that have been purified of what are known as black seeds are shown to be both nutritive and fattening. Screenings that have been purified of what are known as black seeds are shown to be both nutritive and fattening. This is shown not only by laboratory test, but by feeding experiments with cattle, swine and poultry.

When the screenings are put back on the store, the amount of broken wheat and weed seeds contained. Many weed seeds, if not actually harmful, are at least so pungent and distasteful to stock as to render the meal made from the screenings unpalatable. Screenings that have been purified of what are known as black seeds are shown to be both nutritive and fattening. This is shown not only by laboratory test, but by feeding experiments with cattle, swine and poultry.

Will Be A Long Wait

Saloons Will Be Back When All These Absurdities Happen

It does beat the orchestra how some people who won't take any chances on anything else just naturally cut loose and prophesy all over the place!

If I seem to have a pick at calamity prophets, forgive me, for I see red every time I hear one of these every thing going to the bow-wow boys orate.

I have for his ilk all the friendliness a farmer has for the Colorado beetle, or the fruit grower for the San Jose scale.

One of the prophets of evil now especially extant and on the, as it were, rampage, is the fellow who tells us booze is coming back to dwell amongst us as of yore.

This prophesy of his is based on the fact that the British North American act is so complete unfulfillment as are all the prophecies of all prophets of evil and human ravens.

Let me tell you when booze is coming back to its own:

When American mothers adopt the ancient Gangean custom of tossing their infants to the crocodile.

When horse sties are put back on the stage route, now operating with motor cars that do a day's travel in an hour and a half.

When women who have been admitted to their rights renounce the ballot and publicly proclaim that woman's only place is in the kitchen or at the cradle's side.

When nations adopt bows and arrows instead of modern weapons in warfare.

When whipping is generally resumed in the public schools.

When three-months-old chicks begin using for their nightly lodging places the shells they discarded at birth.

When all these and everything else you can think of along the line of equal absurdity have been established as facts, then, and not until then, will the saloon be found in the states that have voted to ratify the constitutional amendment.

Decided steps forward are never retraced.—Swickland Gillan in Farm Life.

Canadian Liquor Traffic

Point Raised That B.N.A. Act Provided for Unrestricted Exchange of Commodities

Ottawa.—In the course of the second reading of the government's Prohibition Bill in the Canadian upper chamber a constitutional point was raised by Senator Pringle to the effect that the British North American Act provided for the unrestricted exchange of commodities between provinces. This point will be the subject of discussion when the bill reaches its committee stage. The leader of the Senate, Sir James Loughheed, said that the bill provided for the continuance of the liquor restrictions which had been adopted, for 12 months after the proclamation of peace. Sir James admitted that the act seemingly interfered with the liberty of the people, adding that that charge could be brought against most remedial legislation. He believed that the moral sentiment of the people was strongly behind the British North American Act in bringing up his constitutional point, founded his contention on the working of a section of the British North American Act, which reads as follows: "All articles of the growth, produce or manufacture of any of the provinces shall, from and after the union, be admitted free into each of the provinces." He contended that neither the Dominion nor the provinces had the power to restrict in any way free trade between the provinces in regard to any article of the growth, produce, or manufacture of any province.

Loan Lotteries in Victory Bonds

London.—The government's victory loan, the details of which were made public, will consist of a four per cent. "bonding loan," issued at 90 and redeemed within 71 years at par by accumulative sinking fund. There is also to be an issue of 4 per cent. "victory bonds" at 85, redeemable at par by annual drawings, commencing in September, 1920.

Appeal to Russian Officers to Fight

"Helsingfors.—It is announced that an allied representative has recognized General Judentich as commander-in-chief of all the troops operating from the south against Petrograd. An appeal will be made to all Russian officers abroad to join in the fight against the Bolsheviks and to help establish a new Russia.

Women Can Fortify

Their Health

With constantly aching backs, weary, dragging-down pains, dizzy and nervous headaches, women have a hard burden to carry. It is wise for every woman to fortify herself against those derangements which are present when extra demands are made upon the system by Nature's laws. No better remedy exists for woman's peculiar ailments than DR. HAMILTON'S PILLS, which possess tonic properties that act upon the proper organs at the proper time. To prevent headache, to overcome dragging weakness, backache, nervousness and pallor — to look well, sleep well, eat well and enjoy the manifold blessings of sound, regular health, every girl and woman should regulate her system by Dr. Hamilton's Pills, 25c per box.

Lost City Discovered

The Forgotten People That Once Lived in New Mexico

A lost city of 20,000 homes has been found in a great canyon barely forty miles from the city of Santa Fe, N.M. It is reputed to be the first known city of the Cochiti tribes of Pueblo Indians of the Southwest. The place is called Rito de los Frijoles, or Tyan-on-yi, and is one of the world's wonders. Here in little caves in the sides of gigantic cliffs, dwell the prehistoric cliff dwellers of America in communal dwellings that were almost immune from attack by either man or the giant beasts of the stone age.

The great ceremonial cave of Kiva, where the people's councils evidently assembled, is located two-thirds of the way up the side of a cliff, in a cave inaccessible save with ladders. The temple is carved out of the solid rock, partly by nature and partly by hand. Little is known about the forgotten people that once lived in this beautiful retreat in New Mexico, although many of the symbols of a race that were visible in the interiors of the recently discovered homes.

"Black Watch"—The Best Black Plug Chewing Tobacco on the Market

Tribute to Portridge

A wonderful old man is Mr. James Nicol, who has just celebrated his 100th birthday in the Kentish village where he lives, and is still going strong. Mr. Nicol, who is a Scot, was born in Tullibulbin, Clackmannanshire, and joined the 74th Highlanders during the reign of William IV, later taking part in suppressing the Indian mutiny. He can do the Highland fling even yet, he says, and claims that the recipe for long life is portridge when one is young. He does not know the taste of meat or tea till he is over seventeen. Mr. Nicol married his second wife when he was 93.

Rioting in Austrian Capital

Copenhagen.—In rioting in connection with a communist demonstration in Vienna Sunday, eight persons were killed and 68 injured. The trouble began when six thousand demonstrators attempted to obtain the release from prison of communist leaders arrested Saturday. The police fired volleys into the air and then into the crowds. The demonstrators succeeded in releasing the communist leaders.

The man who prefers praise to money is happiest when he is working for the good of others.

Oh! Such Pain! dizzy—dragged-down! With dull headache, backache—racking with pain here or there—poor woman, she's one of many. On those days each month, when in other circumstances she would go to bed, she must still be at the desk or counter, or struggle through the day as best she may with her housework or her family cares. Usually she who feels those dragging-down or dizzy symptoms, and other pains caused by womanly disease, can be cured by Dr. Pierce's Favorite Prescription. It cures the cause of these pains. Faded, faded, tired, overworked, weak, nervous, delicate women are helped to strength and health by Dr. Pierce's Favorite Prescription. It makes weak women strong and sick women well. In liquid form.

Caution: Get "Pierce's Favorite Prescription" from a reliable source. I have had occasion to use "Favorite Prescription" quite a lot. I recommend it to my patients and it has been a wonderful help to many of them. I have known of a case where it failed. I have a patient who is using it now and it does her good. I have taken it myself and got the very best results. I consider it the best medicine there is for women who are ailing.—J. L. EMMETT, M.D. Dr. EMMETT, M.D.

Height Of Bird Flights

The Height at Which Various Migrating Birds Are Accustomed to Fly

In spite of their difficult and exacting task, a few farmers have found opportunity to observe and record the height at which various migrating birds are accustomed to fly. Thus, from French soldiers of the air it is learned that swallows have been observed to maintain an average altitude of 700 yards, and wild ducks one of 1,800 yards, and that green plovers have been seen at a height of 2,150 yards. Incidentally it may be mentioned that the ducks were moving at a speed of sixty-five and a half miles an hour when flying upward and sixty-nine miles an hour when flying horizontally. Another aviator, when flying at 9,500 feet, saw swallows high above him. And another, who made his observations at a height of 6,000 feet during a heavy bombardment, with anti-aircraft shells bursting all about him, says that he saw 200 golden plovers, perhaps driven higher than usual by the fact that the vicinity was an unpleasant belt to cross.

Why Can't I Get To Sleep?

Thousands of people all over the country ask this question, but still continue to toss night after night on a sleepless bed, and it is impossible for them to get a full night's refreshing sleep.

Some constitutional disturbance, worry or disease has so debilitated and irritated the nervous system that it cannot be quieted except by the pernicious use of opiates or narcotics. Or again, you have heart palpitation, and sensation of sinking, a feeling you are going to die, or perhaps you wake up in your sleep feeling as though you were about to choke or smother, and the only way you can get to sleep is to lie up in bed.

To all who suffer in this way, Milburn's Heart and Nerve Pills offer an inestimable boon. They bring back the much-needed night's rest by improving the tone of the nerves, strengthen the heart, enriching the blood and making the whole organization act in harmony—then you sleep as peacefully as a child.

Mrs. Jas. Latimer, 39 Leicester St., St. John, N.B., writes: "I am 57 years old, but I had to get up at night in bed, my heart beat so fast, and when I walked upstairs I would get all out of breath. A friend recommended Milburn's Heart and Nerve Pills, and after using two boxes, I can sleep all night and am not out of breath after walking."

Milburn's Heart and Nerve Pills are 50c a box at all dealers, or mailed direct on receipt of the price to T. Milburn Co., Limited, Toronto, Ont.

Bolshevism And Farming

Some of the Absurdities of the Reds as Evidenced in England

Mr. John Macdonald, the "Bolshevik Consul" and strike leader at Glasgow, who is openly anxious to start a Red revolution on the Russian model, in the course of his trial in Edinburgh last May, said he had told the "workers" that if they received all the wealth they created they should have the land, and should not have to pay for it. He is quoted in his indictment as saying also that the farmers should be "compelled" to produce food for the workers. "If they refused, their farms should be burnt." I do not know whether it was explained how British farmers could produce food enough for all the British "workers" (the bourgeoisie, no doubt, as in Russia, would be expected to go without eating), even when their efforts had been stimulated by the burning of their farms.

"If they could (though they could not) grow enough wheat, and rear enough cattle, to supply the working man with bread and beef, they certainly could not furnish him with tea, coffee, cocoa, sugar and tobacco, not to speak of other trifles such as cotton and rubber. But one need not argue against such absurdities in these pages. Unfortunately, their full absurdity is not yet apparent to the younger workmen who have been brought up to inherit the Marxian tradition. In that acute and suggestive book, "Law and Public Opinion in England," Professor Dicey has pointed out that new political and economic theories usually affect the generation to which they are addressed less than the generation which follows."—Sir Sidney Low in Fortnightly Review.

Horsehoofing is a very ancient practice, and William the Conqueror introduced horsehoes into England. Stirrups were, however, unknown to the ancients, who had posts erected on their roads to enable horsemen to mount.

A chemical for preserving art objects in the form of a liquid has been devised by Dr. Chikashige, professor of the Kyoto university. It has proved very effective in protecting wall pictures and other fine arts.

The unsalaried office always has to seek the man.

Reconstruction Of Devastated Homes

Once Rebuilt, They Will Need to Be Refurnished

Paris, France.—Much is being said at present about the reconstruction and reorganization of the devastated districts, yet no one is perhaps displaying a more useful activity in this direction than Mr. Morain, Prefect of the Somme. During the official and anxious hours of the fight for Amiens, Mr. Morain revealed a remarkable firmness of character, and he has now turned his energy and organizing qualities to the great task of assuring the reconstruction of Picardy, which is under his administration. Whilst studying the best way of setting to work, Mr. Morain was struck by the undeniable fact that, once the destroyed homes have been rebuilt, they will need to be refurnished, and he conceived the idea of organizing at Amiens an exhibition of simple furniture and of all the objects necessary for the temporary reconstruction of a home.

This idea was soon put into execution, and the Place Longueville has been transformed into a complete village in wood, each building of which—church, mairie, school, and farmhouses—can be taken to pieces, a fact which will assuredly greatly interest all the visitors.

In the great hall of the fine old Museum of Picardy sciences and letters will be held, whilst another large room of the same building is now a Theatre des Cabarets—the Amiens Punch and Judy show of the celebrated Guignol of Lyons.

The organizers of this exhibition have been continually hampered by the transport crisis, still extremely severe in France. Nevertheless, an important number of large furnishings, each day part in this scheme, and firms take Mr. Morain and his collaborators found new adherents.

This exhibition only comprises the products of French firms, which were asked to exhibit objects characterized by usefulness, solidity, cheapness and good taste. If they realized the importance, the exhibitors were almost assured of doing an important business, for the Picardy peasants are for the most part well-to-do, and are quite willing to buy furniture, and also wooden houses, sheds, stables, and granaries, which will enable them to tide over the time until their former homes are rebuilt.

The exhibition at Amiens will doubtless be appreciated as much by the inhabitants of the towns as by the peasants, for it will enable them to acquire, at comparatively low prices, all the objects they need for the reconstruction of their homes, whilst unconsciously obeying a general artistic direction which they would lack if left to their own devices.

Smoother Ships For Speed

Welded Ship Having Smooth Skin Can Carry More Cargo

From the considerable amount of experience that has been obtained in England on the construction of steam and motor ships with electrically welded joints there is every reason to believe that welding will become one of the standard processes in shipbuilding. By the elimination of rivets and riveting much material and a great deal of costly and tedious labor are saved. The welded ship, being lighter and having a smooth skin, can carry more cargo and make higher speed than a vessel with riveted joints. The welded joint can be made much superior to the riveted joint in compactness and strength. At present it would not be wise to have a welded vessel built by other than a firm of the highest repute, but there is no doubt that a first-class shipbuilder, using all the resources at his disposal, can turn out a welded ship which offers more advantages, structural and otherwise, than are obvious from a first consideration of the problem.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others. It works!

Ouch! ?! ?! ?! This kind of rough talk will be heard less here in town if people troubled with corns will follow the simple advice of this Cincinnati authority, who claims that a few drops of a drug called frezone when applied to a tender, aching corn stops soreness at once, and soon the corn dries up and lifts right out without pain. He says frezone is an ether compound which dries immediately and never inflames or even irritates the surrounding tissue or skin. A quarter of an ounce of frezone will cost very little if you use it as directed. It is a drug called frezone when applied to a tender, aching corn stops soreness at once, and soon the corn dries up and lifts right out without pain. ROYAL YEAST CAKES

Royal Yeast has been the standard yeast in Canada for over 50 years, and it is a well known fact that bread made with Royal Yeast possesses a greater amount of nourishment than that made with any other.

Encourage The Boys

Farmers who are the fathers of boys who are beginning to show some signs of restlessness on the farm, and an inclination to break away to the cities or some faraway pasture which looks so green to them, should not be slow to seize the opportunity presented by the industrial unrest in all the larger centres of population and impress upon the boys the many advantages which farm life has over city life.

Life in our modern cities has degenerated in the case of tens of thousands of men and women into a struggle to make ends meet, to try and secure a few of the comforts, conveniences and pleasures of life without going into debt, to feed, clothe and educate their children and at the same time accumulate a little something against approaching old age.

To other tens of thousands city life has come to mean so many hours of toil in office, store or factory in order to obtain the wherewithal to live and as much more as possible to spend in dissipation and pleasure. City life is warping the nature and destroying the character of these young people, and when it is too late they realize in bitterness of spirit that they have missed the true and beautiful things of life.

Nevertheless, city life has wonderful attractions for youth. It would be foolish and a mistake to shut our eyes to that fact, or to attempt to minimize it. Men and women, youths and maidens, are social beings. They long for friendships and comrades. Their very natures demand recreation and happiness. All work and no play makes Jack a dull boy, and a dull existence is never a happy or contented one.

It behooves the farmer who has boys at home not to become so absorbed in his farm as to forget that he himself was a boy once and had a boy's longings. He should ever strive to retain and understand his boy's feelings, and create conditions on the farm, and in the farm home that will lead to contentment and not discontent on the boy's part.

The average boy will be satisfied and take an ever-growing interest in the farm if he is given an opportunity where by his own efforts, and working by taking an active interest in the farm, he can accumulate something that he can call his own. It would seem to be wise, therefore, to, as early as possible in a boy's life, allot him a piece of land to be worked by him and the profits from the produce of which will belong to him. Or give him a calf, a colt, a pig, or two, or some poultry, to be his own property and his special care, and the increase from which is his.

And as the boy grows in years and strength, and begins to take the place of a man on the farm, he should be treated as a man and paid the rewards of his labor as any other man would be, and not be expected to work merely for his board, clothes and lodging.

The farmer-father who forgets the aspirations he himself had as a boy and youth, and who keeps his sons working for him with little or no opportunity to better their own condition and accumulate something for themselves, is providing not only an excuse, but a strong inducement, to the boys to leave the farm-home and strike out for themselves elsewhere, too frequently, alas, away from the land altogether and in the less natural and satisfactory life of the cities.

Scores of examples can be recalled where farmers with sons so failed to understand the psychology of youth that when they themselves approached middle and old age not one of their boys were to be found with them on the land, all had drifted away into professions, or business, or become clerks and workers among the masses in the cities. Had these boys been given the chance at home, which they saw for themselves away from home, in a word, had they been afforded an opportunity to do something for themselves, many would have been happy and content to remain on the land. And all would have been better off.

In Western Canada, in particular, where it is so difficult to obtain sufficient and reliable farm help, farmers should exert themselves to the utmost to retain the services of the best and most experienced of all such help, namely, their own boys born and brought up on the land. It can be done by a little encouragement and the providing of an incentive such as the boys find elsewhere.

And in the years to come, as old age creeps on, the farmer-father will find his reward, and a great and substantial one it will be, while as they grow up in manhood in the independent life of the farm and away from the strife and unrest and more and more intense struggle of the cities the boys themselves will be happy and thankful. And in the larger sense, the whole nation will gain and be socially and economically benefited.

If some men were to accuse themselves of being liars, lots of their acquaintances would believe them.

AN APPALLING CONDITION

Invariably results when you use a cheap corn salve. Be judicious, use "Putnam's" for five years it has cured corns and warts that nothing else can touch. Ask for Putnam's Patent Corn Extractor, only 25c at all dealers.

A Bit Behind

The strike was on, and walking home was "the only way." When Johnson arrived at his suburban home in the far north in the small hours of the morning, he sent a wire to the office:

"Will not be at the office today. Am not home yesterday yet."

Keep Minard's Liniment in the house

The U. S. Bomb Outrages

Criminally Minded Think to Accomplish Their Purposes By Killing

"When the governments of the world have been preaching force without stint for five years as the means of accomplishing their aims and desires, it is not surprising that unbalanced or criminally minded individuals should likewise think to accomplish their purposes by killing and destruction. The fresh bomb outrages are the most unhappy illustration possible of the hateful idea that the way to achieve reform is to use violence. There is no place in America for terrorism of this sort, and not the slightest need of it; for the Anglo-Saxon way of altering social and political institutions by free debate and discussion remains the only sound and safe one. What these fanatical bomb throwers will accomplish is nothing less than further restrictions on immigration, the immediate passage of severely restrictive and reactionary legislation at Washington and the strengthening of the hands of visionless legislators. — The New York Nation.

Famous Monument Left Unscathed

May Have Found Special Favor In The Militant German's Eyes

London, England.—There is at Villvorde, near Brussels, a monument to the great Englishman and martyr, William Tyndale, translator of the Bible. On its low flat base are inscriptions in English, French, and Flemish, and the German invaders of Belgium, with their known propensity for vandalism, had ample opportunity during four years of occupation to damage or remove the monument. On the other hand, Tyndale, by virtue of his peculiar association with Germany, may have found special favor in the militant German's eyes.

William Tyndale was a native of Gloucester, but his sympathy with the new learning aroused suspicion, and he removed to London. Finding it, however, impossible to complete his translation of the New Testament and the Pentateuch, upon which his fame with posterity rests, he removed to Hamburg and later to Cologne, and hence became identified with the Luther movement. He began his printing in 1525 in the very city which now forms the headquarters of the British army of occupation on the Rhine.

Following the signing of the armistice, inquiry was set on foot as to the fate of the monument, and it now appears that it shows no signs of material injury. Owing, however, to the absence of any protecting fence, the inscriptions, which were lightly cut, have become very indistinct, and may have to be cleaned and regilt.

\$100 Reward, \$100

Cataris is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in its efforts to cure. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

Budget of Russian Soviet Government

Copenhagen, Denmark.—A Helsinki message states that the Russian Soviet Government's budget for the first half of 1919, which was recently adopted, estimates the revenue at 20,000,000,000 rubles, and the expenditure at \$50,000,000,000. It was resolved to cover the deficiency by a new issue of paper money.

New Order Of Life Foreseen

King George Declares That A Victory In Peace Can Only Be Won By Unselfish Co-operation

Leicester, England.—The King and Queen arrived in Leicester recently on one of the many visits to industrial areas contemplated by their majesties. In acknowledging the address of the townspeople, the King said: "In all our historic past we have experienced no such time of strain and stress as during the last five years, but by the blessing of God and the united and heroic efforts of our people, our country is safe and our cause is victorious. To build upon the foundation of the past, a new order for our common life must be our task for the future. May we preserve our strength and renew those ideals of liberty and freedom for which we have fought. Only by unselfish cooperation of all classes can we win a victory in peace as we have in war."

Finally the King expressed a desire to join with the people in the work of peace as they had shared the anxieties in war.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Cure.

Plan To Benefit Fishermen

London, England.—The Admiralty have under consideration a project to benefit fishermen who served in the war. It is proposed to form a commercial company in which fishermen will be shareholders. The Treasury will be called upon to lend the money necessary to start the business and 400 trawlers and drifters built by the Admiralty during the war for mine-sweeping and patrol work will be handed over to the fishermen as part of the enterprise. There is no intention of competing with other companies and the Admiralty does not propose to make any profit out of the scheme.

The Cheerful Giver

The father of a St. Louis lad had given him a ten-cent piece and a quarter, telling him that he might put one or the other on the "church contribution plate. At dinner the father asked the boy which coin he had given. "Well, father," responded the lad, "at first it seemed as though I ought to put a quarter on the plate, but just in time I remembered the saying: 'The Lord loveth a cheerful giver,' and I knew I could give the ten-cent piece a great deal more cheerfully, so I put that in."

Kansas Alive To Danger

Attorneys to Assail I.W.W. Agitators of Wheat Belt

Kansas City.—County attorneys in the Kansas wheat belt will meet at Hutchinson, Kansas, to combat the I.W.W. agitators reported active in that section of the state. Further reports that the wobblies are "flogging up" (mobilizing) continued to reach the office of U.S. Attorney Robertson here.

The agitators are avoiding the cities and gathering in small ground holdings, meeting in the woods, where they plan their campaign. So far no acts of violence have been reported, but Attorney General Hopkins has issued instructions to all local officials throughout the state relative to handling agitators.

Colds Cause Grip and Influenza
LAXATIVE BROMO QUININE Tablets remove the cause. There is only one "Bromo Quinine." E. W. GROVES' signature on the box.

Justice Pinlay to Visit West

Winipeg.—The Right Hon. Lord Pinlay, ex-lord chancellor of England, one of the members of the judicial committee of the privy council, has accepted the invitation of Sir James Atkins, president of the Canadian Bar Association, to attend and address the annual meeting of the association to be held at Winipeg August 27 to 29.

"Black Watch"—The Best Black Plug Chewing Tobacco on the Market

Tammany Against Bolshevism
New York, N.Y. — Tammany has now come out against bolshevism.

On Charles F. Murphy's motion, the executive committee has adopted a resolution dedicating the organization to the "active and energetic conduct of a non-partisan campaign for American and American institutions," and all democratic headquarters will be asked to promote this end, under direction of a special committee. Tammany declares that the rights of free assembly, free speech and a free press do not include or permit organized propaganda and attacks against the Constitution itself which secures this right.

Minard's Liniment Lumberman's Friend.

When They Ate

Visitor (hungry): And at what time do you have dinner, my little man?
Boy: Soon as you've gone. — Pearson's Weekly.

Dora: Agnes married a self-made man, didn't she?

Ethel: Yes, but she has compelled him to make extensive alterations.

Most infants are infested by worms, which cause great suffering, and are promptly dealt with by may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

Tourists In New Zealand

Auckland, N.Z.—With the coming of peace the stream of overseas visitors is again rejoicing the hearts of New Zealand tourist officials. American travellers are in the majority, but it is expected that a large number of British officers will visit New Zealand's thermal regions and will enjoy the Dominion lakes and streams.

Vast tracts in Western Canada, rich in mineral deposits and fine timber, are shortly to be placed under the scrutiny of experts through the use of aircraft, specially constructed for the purpose.

It Will Cure a Cold.—Colds are the commonest ailments of mankind, and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it cases the indurated throat it will stop the cough because it always all irritation in the throat. Try it and prove it.

The average woman doesn't believe in equality of the sexes; she thinks she is a little more than equal.

If you trust to luck for anything you'll be lucky if you get it.

Ask for Minard's and take no other

No Choice

Germany carefully inspecting the Allies' peace terms must imagine she is in the position of the guest in the Manchukuo hotel thirty years ago. The waiter leaned on the table and, breathless, heavily, asked: "What'll ye have, pie or puddin'?" "Pie," said the guest. "Ye'll have to take puddin'," replied the waiter; "we have no pie."

Any man who can deliberately pass a dog fight on the street without glancing at it possesses true dignity.

FLEET FOOT

brings City Styles to Country Homes

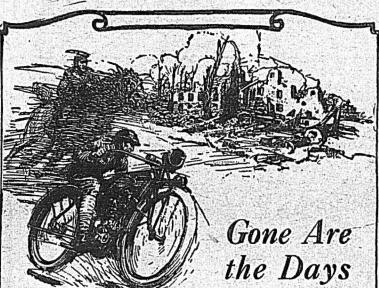

Shoes enable women and girls on the farms to wear the same smart summer footwear as their sisters are wearing in the cities.

Shoes are restful, comfortable, and carefully made for sturdy wear—and their low price enables you to have several pairs for the price of one pair of leather shoes.

There are also shoes for men and boys, for work and play, for every member of the family.

Ask your dealer for Fleet Foot Shoes. The name is stamped on each pair.

Gone Are the Days

Couriers on horse back were good enough in '61 but they gave place to despatch bearers on motor cycles when Pershing flattened the St. Mihiel salient in forty-eight hours.

Castor oil, salts, mineral waters, pills and such purgatives were good enough in their day. Today they are giving place to Nujol. Nujol is entirely different from drugs as it does not force or irritate the bowels.

Nujol prevents stagnation by softening the food waste and encouraging the intestinal muscles to act naturally, thus removing the cause of constipation and self-poisoning. It is absolutely harmless and pleasant. Nujol helps Nature establish easy, thorough bowel evacuation at regular intervals—the healthiest habit in the world. Get a bottle from your druggist today.

Warning: Nujol is sold only in sealed bottles bearing the Nujol Trade Mark. All drug stores, insist on Nujol. You may suffer from substitutes.

China—Rich, Yet Helpless

No man has computed them. There is enough coal in the one province of Shansi to last the entire world for some hundreds of years. China has also great iron mines. The copper mines of Czechwan and Yuannan are very rich and may make China the greatest copper producing nation in the world. She is now producing a large amount of antimony. There are possibilities of gold and silver in North China and in the mountains of Eastern Tibet.

There are even unheard of possibilities in Chinese agriculture. Their land is constantly enriched and irrigated, and after 5,000 years the Chinese farms still average from two to four crops a year.—World Outlook.

Less War Drunkenness

London.—Convictions for drunkenness in England and Wales have decreased in past four years under the operations of the liquor control board, according to its announcement. The board states that convictions of men and boys in 1915 were 35,457; in 1918, 6,990. In the same period convictions of women decreased from 15,915 to 3,211.

Gentle Hits
Our new coins don't look as if they would buy as much as the old ones did, and they won't.

Why shouldn't soldiers sleep on their knapsacks?

A fish in the hand is worth a dozen in the angler's story.

WHITEWEAR

Hot weather is here

Wear white goods and can keep cool

White Canvas Shoes, in low and high styles. Have these for ladies, misses and kiddies
White Waists in lawns and voiles
White Wash Dresses. These are in nice patterns of gingham and should wear and wash well. These come in ladies, misses and infant sizes.
White Hosiery. In silk, lisle and cotton
Summer Underwear. Have fine lisle goods, in separate piece or combination. Also White Underskirts and Night Dresses, with lace or embroidery trimming.
Hats. We still have some very nice Hats, in canvas, cloth and straw. These are not expensive, yet they are serviceable

Chinook Breezes

Mr. D. Evan Jones, of the provincial health department, was in town last week.

Mr. J. Ray, of Indian Head, government tree inspector, was a visitor in Chinook on Monday.

Mr. J. H. Chapman, of Sask., is visiting his son, W. Chapman, proprietor of the pool hall.

Mr. Jas. Wright, of Thornbury, Ont., is visiting his son, Mr. W. R. Wright.

W. R. Key, who has been on a visit to his parents at Barrie, Ont., for a few weeks, returned to Chinook last week.

Among the tenders for telephone construction, asked for by the government is one from Cereal to Sedalia.

Mr. A. H. Peck, of Viscount, Sask., is in town this week. Mr. Peck reports that crops are in a pretty bad shape out that way.

ROBERT—At Mrs. Mitchell's maternity hospital, Chinook, on Monday, June 23rd, to Mr. and Mrs. Lesley Robert, of Cappon, a son.

Mr. P. A. Woodcock, government homestead inspector, was at Chinook this week, looking up some land for soldier settlements in this district.

The tearing down of the old Alberta Pacific elevator is about completed, and the cement work for the foundations of the enlarged elevator will be quickly laid.

The sale of home cooking, on Saturday last, under the auspices of the Women's Institute, realized between \$40.00 and \$50.00, which goes towards the funds for a ladies' rest room in Chinook, a very laudable and appreciated object.

Mrs. J. Stevenson, organizer for the W.U.F.A., was in Chinook on Tuesday to organize a branch for Chinook. A very successful meeting was held in connection with the Chilmark and district U.F.A., and a branch of the W.U.F.A. was organized there.

Mr. W. Cruickshank, manager of the Union bank here, has received definite word that a new brick two-storey bank building is to be erected at Chinook, equipped with brick vault, bath rooms, etc. Work to commence at once. This will be the first brick building in Chinook.

was impounded in a pound kept by the undersigned, s.w. 1/4 35-29-6 w. 4

T. MIDDLETON, Poundkeeper
June 1, 1919 Cereal, Alta.

Pound Notice

Notice is hereby given under Sec. 210 of the Rural Municipality Act, that

One light bay mare, 2 hind feet white, branded EO on right shoulder.

One brown mare, light limbs, branded EO on right shoulder.

One black mare, white stripe in face, branded LK on left thigh, this brand is blotched a little, but this is as near it as I can make out, were impounded in the pound kept by the undersigned on the SE quarter Sec. 28, Twp. 28, Rge. 8, west of the 4th mer., on 15th day of June, 1919.

Dated at Chinook, this 20th day of June, 1919.

R. J. Marr,
Poundkeeper.

Harry James met with a very painful accident last week, when a plow share fell across one of his feet, crushing it badly.

Word has been received of the death of the Rev. Mr. Eason, a former pastor of the Chinook Church. The cause of death was heart trouble, of which he complained when living in Chinook.

The marriage of Miss Pansy Hawkshaw to Mr. Herbert Hogg, who has just returned from overseas, was solemnized at the home of the bride on Monday evening at 9 o'clock, the Rev. Sykes performing the ceremony.

The bride is a daughter of Mr. W. H. Hawkshaw, late of Chinook.

The many friends of Dr. Paul welcomed him back to Chinook on Sunday morning. Mrs. Paul and daughter will return later, as soon as the doctor can make arrangements for a house. In the meantime, the doctor will be found at his office at the old stand, one door north of the hotel.

BAILIFF'S SALE

Under and by virtue of an Order for Sale given by the Master in Chambers to The International Harvester Company, The Crown Lumber Co., J. R. Miller, H.
